

Introducing The Mobile Patient Communicator™ (MPC)

Interactive Software Solutions for Mobile Patient Kiosks

International Medical Solutions' interactive software provides patients comprehensive access to personal and medical data via portable touch-screens during visits to their provider's practice. The MPC provides easy-to-use applications that support check-in/ registration, electronic form completion, patient-initiated Instant Medical History (IMH) interviews and chronic disease education, all while boosting provider and staff productivity.

Our Mobile Patient Communicator enhances your practice's performance by delivering improved:

- Productivity
- Efficiency
- Patient Safety

Benefits

- Faster Patient Check-in
- Reduced Clerical Staff Support
- Greater Clinical Staff Productivity
- Improved Patient Flow and ROI

Features

- Patient-Initiated Instant Medical History
- Electronic Check-in & Form Completion
- Personalized Educational Videos
- Interfaces to PM and EMR Systems

Mobile Patient Communicator applications streamline all patient tasks including check-in/registration, Instant Medical History assessment and educational sessions. . . PLUS they create more time for clinical staffs to conduct additional patient evaluations.

Patient Registration/ Check-in

Immediately upon arrival, the MPC welcomes users to the office electronically and allows patients to:

- Follow on-screen prompts and queries to check-in
- Update their demographic and medical profile
- Complete required paperwork and file consent forms

Patient-Initiated Instant Medical History

To enhance their experience, the MPC allows patients to complete Instant Medical History interviews in the waiting room, thus making exam room conversations more meaningful. Once completed, interview results can be:

- Transferred to an EMR
- Saved to an on-site database
- Printed at the nurse's station

With this sort of data accessibility, doctors begin patient examinations better informed, resulting in more tailored/in-depth discussions.

Chief Complaint
Jane S Doe is a 27 year old female. Her reason for visit is "headaches".

History of Present Illness
#1. "headaches"
Location
She reported: Headaches localized to a fingertip location.

Social History
She reported: Employment status employed for wages.
Activities for Daily Living
History of: Pain interfered a little with normal work in the past 4 weeks. Missed work. She denied: Reduced productivity doing housework because of migraine headaches.

Patient Education Module

During waiting intervals patients can view informative videos about their acute illness or chronic condition and medical procedures. User-friendly for all ages, the MPC:

- Delivers subject matter specific to the patient's stage of care
- Offers disease-specific video and interactive tutorials
- Performs pre- and post-instruction tests

Educational videos viewed by patients are automatically logged, making it easy for physicians to bill patients as appropriate.
